PLASTICS AND RUBBER EQUIPMENT

BUYERS' GUIDE

British Plastics Federation

Downloadable at www.bpf.co.uk

THE BPF's PLASTICS & RUBBER EQUIPMENT GROUP

This is a Buyers' Guide to the plastics and rubber machinery manufacturers produced by the British Plastics Federation (BPF). The companies listed are members of the BPF's Equipment Group. They manufacture all types of machinery and ancillary equipment as well as software to enhance efficiency of plastics production. You can contact British Plastics Federation members with complete confidence as they are leaders in their respective field and with a track record of reliable service and meeting the highest possible standards.

The BPF has made every effort to ensure that the information contained in the Guide is correct at the time of publication. Whilst every care has been taken in the preparation of this Guide, the BPF accepts no responsibility for errors in or omissions from this publication. For further information about this Guide contact the BPF on 0207 457 5000, email bpf@bpf.co.uk or visit www.bpf.co.uk.

To view the full range of BPF Buyers Guides visit: www.bpfbuyersguides.co.uk.

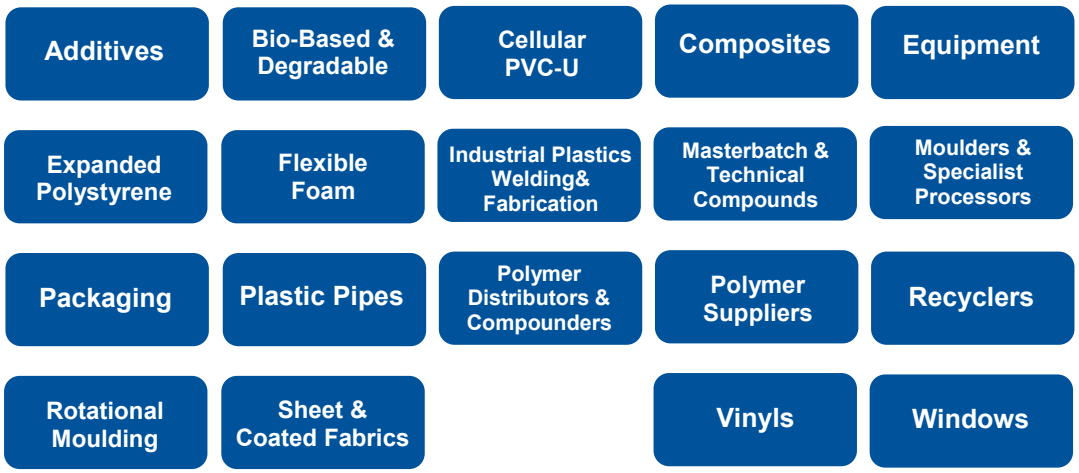
ABOUT THE BRITISH PLASTICS FEDERATION

The British Plastics Federation (BPF) is the leading trade association of the UK Plastics Industry, with over 400 direct members and over 1600 affiliated members. The Federation is a platform for industry action that exists to exploit common opportunities and resolve shared issues. The BPF consists of 20 Business Groups with its membership incorporating the entire plastics supply chain including materials, processors, equipment suppliers and recyclers.

BPF GROUP STRUCTURE



Billion UK Ltd

BILLION manufacture a complete range of injection moulding machines from 50 – 2650T. Well reputed for their experience and knowledge for two shot applications, which stems back more than 50 years. Drive technology includes hydraulic, electric and hybrid versions. BILLION are well known for supplying highly versatile and productive machines, backed by a high level of technical support.

Buhler Sortex Ltd

The SORTEX Z+, with its high resolution visible and infrared cameras, is certainly the most efficient sorter for all types of recycled and virgin plastic. Applications include uPVC window regrind, PET, HDPE, WEEE residue, PVB, PP, ABS, PS and plastic pellets. Its camera power, combined with PROfile Technology, delivers outstanding performance in removing plastics in unwanted colours, foreign materials as well as colour grouping and recovery of valuable metals such as copper.

Instron Ltd

Instron manufactures and services material testing systems and accessories for the Plastics Industry. In addition to Instron's traditional Test Systems for tension, compression, flexure, fatigue, torsion and hardness, our CEAST range of Plastics Testing Solutions include: Melt Flow Testers, Capillary Rheometers, Impact Test Systems (Drop Tower & Pendulum), Thermal Testing (HDT & Vicat), and Specimen Preparation. For further information go to the "Testing Solutions" tab at www.instron.co.uk and select the "Plastics" link.

Tinius Olsen Group

Tinius Olsen is the leading specialist manufacturer and supplier of static tension and/ or compression materials testing machines. Our machines are designed for use in Research and Quality Control to measure material's strength and erformance. Using Tinius Olsen equipment it is possible to perform such tests on raw materials such as polymers, rubbers, adhesives as well finished components

Waste Web Ltd

WasteWeb provides a real-time, Business-to-Business trading platform for Waste Products, Recyclables and Services.
Think of it like an Ebay for Waste; Manufacturers, Recyclers and Service Providers can buy and sell products and services, at a price that's right for them.
It's simple to use, membership is FREE and listing your items or services to trade is FREE.
Users trade in minutes and you only pay a small fee when you trade successfully.
Why not try it? - WasteWeb is your storefront to the whole UK waste industry.

Xtrutech Ltd

Xtrutech manufactures screw elements, shafts, barrels and provides process optimisation for Twin Screw Extruders including W&P / Coperion, APV / Baker Perkins, Theysohn, Leistritz, Brabender, and Thermo-Prism machines. Xtrutech's range of Twin Screw Extruder's are designed for R&D of Thermoplastics, Biopolymers', Medical plastics' and Pharmaceuticals'. The XTS 19 is a bench top system. The XTS24 is very compact and ideal for scale-up to production and for processing larger samples. Xtrutech has an extensive range of bespoke ancillary equipment that can be customised to meet your exact process requirements; strand pelletiser line, dry face cut pelletiser, sheet & profile extrusion, chill rolls, film extrusion, with calibration units, in-line lamination and thin film coating dies, cooling tunnels, caterpillar haul-offs and coiler units.
