ADDITIVE SUPPLIERS GROUP

With over 25 member companies, the BPF Additive Supplier's Group is the only national plastic additives grouping in Europe, if not the world. Encompassing suppliers of fillers, flame retardants, colourants, stabilisers and special effects additives, the Group has been working to promote their role in plastics processing and products since 1976. The Group is quick to point out the important role that additives play in the innovation of plastic products brought about, in large measure, by the huge advances made in additives technology.

Members of this group are involved in almost every element of BPF activity as their interests in plastics are so substantial, crossing every application and issue.

The Group is actively involved in:

- promoting the Federation as an alliance of companies from all aspects of the plastics supply chain
- Keeping abreast of the numerous legislative developments affecting plastics in all applications
- Promoting plastics in general

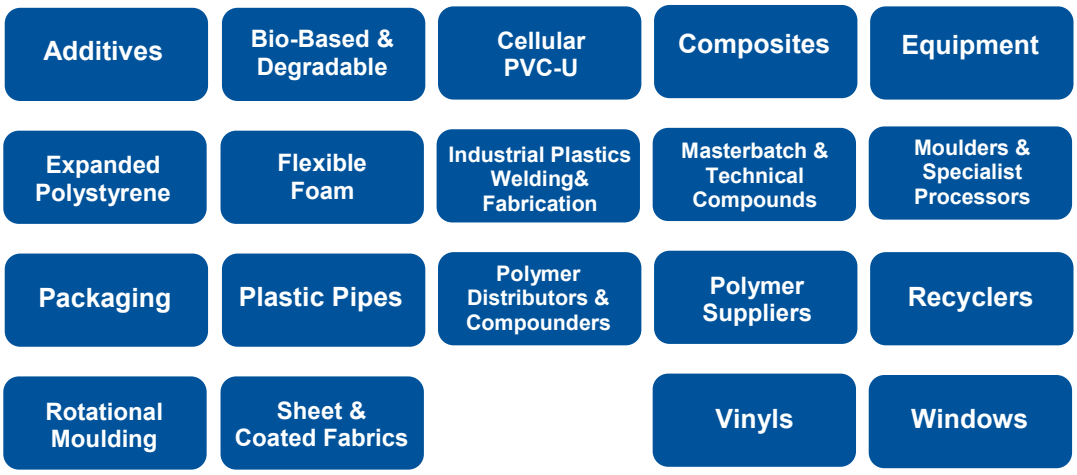
Additive Suppliers Group Members have been instrumental in compiling this guide and are listed on the following pages.

ABOUT THE BRITISH PLASTICS FEDERATION

The British Plastics Federation (BPF) is the leading trade association of the UK Plastics Industry, with 400 direct members and over 1600 affiliated members. The Federation is a platform for industry action that exists to exploit common opportunities and resolve shared issues.

The BPF consists of some 22 Business Groups with its membership incorporating the entire plastics supply chain including materials, processors, equipment suppliers and recyclers…

BPF GROUP STRUCTURE



PRODUCTS & SERVICES

All the companies listed are members of the BPF's Additive Suppliers Group. This means that you can contact them with complete confidence - confidence in companies that operate in highly competitive markets - confidence in companies whose products achieve the highest possible standards.

Readers are advised to consult individual company websites as shown in the company profiles for further information
