OVERVIEW
In the modern business world overall plant and equipment efficiencies are of paramount importance, not to mention the environmental advantages that such techniques have. Many customers are now specifying ever more rigorous criteria for you to win their business.

With this backdrop the BPF & PTL have joined forces to present the first in a series of seminars aimed at helping you & your organisation address these issues.

THE SEMINAR
Your day will include a series of lectures and presentations during the morning and real time practical demonstrations on machinery during the afternoon.

AGENDA
10.00 The energy savings and efficiencies gained by the use of electric moulding machines vs hydraulic (Roger Evers, Krauss Maffei)
10:30 Increasing manufacturing OEE & profits with real time production and processing technology (Andy Jewell, Mattec)
11:00 Coffee break
11:15 Increased profits and advantages of using assisted injection moulding techniques (James Jenkins, Cinpress)
11:45 Cavity Pressure measurement to achieve “Zero Defect Production” in injection moulding (Eddie Jackson, Kistler)
12:15 The importance of qualifications and accreditation (Jan Czerski, IOM3)
12.30 Lunch
13.15 Practical demonstrations
15.30 Q & A and Close
16.00 Close
