EPI (Europe) Ltd

As part of the EPI Environmental Products Inc Group, EPI (Europe) Ltd markets a range of additives called TDPA® (Totally Degradable Plastic Additive). These render plastic degradable and ultimately biodegradable. Major retailers around the world are using TDPA in many types of single use plastic items. TDPA is a cost effective, quality product requiring no special equipment or processing.

Impact Laboratories Ltd

Impact Laboratories was formed in 2002 as a management buy-out from BP Chemicals, Research and Development, Grangemouth. It aims to be the global leader in consultancy and testing services for the polymers and plastics industry offering world class and independent expertise in polyolefins. The company works in three business sectors: International, Technical Consultancy &

Mattec
www.mattec.com
Mattec supply real-time (shop-floor) scheduling, production and process monitoring (including SPC/SQC) systems to the world-wide plastics and rubber manufacturing/converting industry (plus other manufacturing industries). CMS Software (Mattec's parent company) supply integrated Enterprise Resource Planning (ERP) software solutions to the same manufacturing industries.

Meech Static Eliminators Ltd
www.meech.co.uk
Meech International has provided static control solutions for over 40 years with more than 7000 customers worldwide benefiting from improved quality, productivity and profitability. Meech products are fully supported by a first-class service infrastructure through subsidiary companies in USA, Belgium,

NDC Infrared
www.ndcinfrared.com
NDC is the leading supplier of on-line gauging and control systems for the continuous web processing industries. We offer a wide range of sensors and system configurations to cover extrusion, calendering, coating and converting, rubber, textile and more. NDC systems will enable you to maximise your process profitability and product quality.

Polymer Training Ltd
www.ptlonline.org
Polymer Training Limited (PTL) is a major international resource centre for the polymer industry, specialising in training, further education and providing support for product design, materials selection, company and product incubation, tool trialling and prototyping. Owned by the Next-tec Group, PTL in its various forms has over thirty years experience of supporting the polymer sector.

Rapra Ltd
www.rapralimited.org
Rapra Limited is a Membership-based organisation, supporting polymer sector initiatives on behalf of its Members and providing Members with privileged access to world-class research, technical and information services in plastics and rubber. Rapra’s International Membership comprises polymer manufacturers and converters, as well as companies from a wide range of end user sectors.

Tinius Olsen
www.tiniusolsen.com
Tinius Olsen is a leading global specialist manufacturer of materials testing machines. Our machines are designed for use in Research and Quality Control to Measure, Prove and Check material’s strength and performance. Please see our website www.tiniusolsen.com for details on our range of testing equipment.

Victory Lighting
www.victorylighting.co.uk
Victory Lighting (UK) Ltd., supply a wide range of high quality Infra-Red emitters, Ceramic, Medium Wave, Fast Response and Gold Reflector Twin Tube Lamps.

Zotefoams
www.zotefoams.com
Zotefoams plc manufactures a range of closed cell cross-linked foams using a unique, environmentally friendly, clean, non-contaminating, nitrogen expansion process that produces inert foam without blowing agent residues and with a uniform cell structure and regular cell walls. Zotefoams plc products are used in a variety of markets including sports and leisure, packaging, transport, healthcare, toys, building, marine and military.
Overview of British Plastics Market

The UK Plastics industry is a Global leader operating at the cutting edge of technology. Sales account for approximately £17.5 billion (approximately 2.1% of UK GDP), the industry employs 220,000. The industry is a dominant player worldwide in the three core sectors that make up the plastics industry: material and additive manufacture, material processors and machinery manufacture.

UK Plastics Consumption (ktonnes) 1973-2010

British Plastics Federation (BPF) is the leading trade association of the UK Plastics Industry, with over 1000 member companies (inc. affiliate) representing approximately 80% of the industry turnover. Membership encompasses polymer producers, suppliers, processors, additive and machinery suppliers and manufacturers as well as plastics recyclers.
