How to Reduce Your CO2 Emissions and Your Energy Costs

DATE: 8th November 2016
TIME: 10.00am
LOCATION: 6 Wellington Place, Leeds
LS1 4AP

CONTACT: Angella Ladner BPF Energy
EMAIL: energy@bpf.co.uk
TEL: +44 (0)207 457 5006
WEB: www.BPFENERGY.co.uk
PRICE: Delegate fee £25 + VAT
How to Reduce Your CO2 Emissions and SEISMIC PROGRAMME:

09.30  Registration and Refreshments

10.00  Chairmans Introduction
       Peter Haslop, British Plastics Federation

10.15  Combined Heat and Power (CHP) gas engine technology to generate electricity and heat on site, adopting absorption chillers where cooling loads are significant
       Bob Wilcox Energy Consultant

11.00  The Anatomy of an Energy Invoice. Understanding your energy invoice and explaining the charges with an emphasis on non commodity charges both present and future
       Jordan Rassas Energy Consultant

11.45  Morning Break

12:00  What the Future Holds for Climate Change Agreements
       Peter Haslop BPF

12:15  CCA Compliance and Reporting
       Yolanda Starkie BPF

12.30  Networking Lunch

13.15  Break Out Sessions

The afternoon will be dedicated to small break out sessions.

Working Groups will be available on:
- CHP – Trigeneration with absorption chillers
- Energy invoices
- CCA Compliance
- NOVEM

Appointments can be booked for those who would like 121 guidance

George Fowkes  
Base Power  
George Fowkes is co-founder of BasePower, a build-own-operate developer of industrial Combined Heat and Power (CHP) projects. George heads the business and project development effort, serving customers in energy-intensive sectors such as plastics manufacture. After nearly 20 years in energy generation and efficiency he met BasePower’s other co-founders at Tamar Energy.

Peter Haslop  
British Plastics Federation  
Peter Haslop has an engineering background with over 46 years experience in the manufacturing industry. He has vast experience of the energy efficiency and environmental technologies industries. Before joining the BPF Peter worked for over 8 years with a leading Energy Consultancy where he was responsible for managing a team of consultants involved in the processing and completion of climate change agreement applications and the on going management. Peter is a frequent speaker at energy efficiency events.

Jordan Rassas  
Business Wise Solutions  
Jordan works in partnership with market-leading energy consultants to create strategic buying plans for a wide range of large consumers. Specialising in the manufacturing sector, Jordan has been successful in delivering savings to some of Europe’s largest manufacturing businesses. Offering a vast knowledge of energy reduction technology, built up during his time as head of technology/business development for one of largest energy consultants in Europe, Jordan is well placed to impart his industry expertise.

Yolanda Starkie  
British Plastics Federation  
Yolanda Starkie is the Administration Manager of the Plastic Sector CCA. She has been the principle administrator of the scheme from its beginnings in October 2009, supporting in excess of 350 manufacturing sites in their application.

Bob Wilcox  
Energy Consultant  
Bob Wilcox has more than 25 years experience in the Energy sector working with utilities and multinationals to reduce energy costs and deliver cost effective system solutions. Bob is a chartered Mechanical and Electrical Engineer and also has experience of managing a business designing and moulding large Polymeric components for high voltage applications.
