Show your commitment to the environment and sign the pledge

OPERATION CLEAN SWEEP® (OCS) is an international program designed to prevent resin pellet loss and help keep pellets out of the marine environment. Every segment of the plastics industry has a role to play by implementing good housekeeping and containment procedures. This includes resin producers, transporters, bulk terminal operators, plastics processors and recyclers.

To find out more and to sign up visit www.operationcleansweep.co.uk

Pledging will help strengthen your company’s:

- Contribution to preserving water quality and wildlife
- Employee health and safety program
- Operational efficiency
- Reputation in the community
