Kindly Sponsored by
The BPF Rotational Moulding Group seminar for 2019 will explore the design benefits of using rotational moulding. The event will examine the use of rotationally moulded products in different applications.

Featuring expert speakers such as Gareth McDowell and Martin Spencer, this two day event will look at the use of rotational moulding in the medical, marine and automotive environment. We will also look at designing for recyclability as well as new generational materials that you should be aware of.

Who should attend: This seminar is aimed at senior and middle managers from companies in the plastics industry who rotationally mould.

Seminar Programme

3rd June 2019

17.30 Networking and the opening of the trade exhibition.
(Buffet dinner served from 18.30)
19.30 Close

4th June 2019

09.25 Registration opens for student attendees
09.45 Basic Rotomoulding and Design Principles (Student Session)
Dan Ralph, Leafield Environmental
09.45 Registration opens for all other attendees
10.15 Introduction from Event Chairperson
Phil Maddox, Leafield Environmental
10.30 The Potential For Our Industry—And How We Can Achieve The Growth We Want.
Gareth McDowell, 493K
10.55 Rotational Moulding in the Medical Sector—Challenges and Opportunities
Les Druyf, LyondellBassell
11.20 Morning Break
11.40 Rotational Moulding in the marine environment - designing for unique conditions
Shane Black, Fatyak Kayaks
12.05 Rotational Moulding Powders for the Automotive Industry
Peter Mackrell, Matrix Polymers
12.30 Networking Lunch
13.30 Designing for Recyclability & Efficiency in Rotational Moulding
Phil Maddox, Leafield Environmental
13.55 Design for the Future: New Material Opportunities
Martin Spencer, Uniqueroto
14.20 Roto Products Design & FEA
ONEPLM
14.55 Precision Toolmaking: the key to executing good design, Persico
15.20 Event Closes
