About the BPF

80+ years
The leading voice of the UK plastics industry

#1
The world’s first plastics association

80%
Representation of UK plastics industry by turnover

30+
Dedicated staff

500+
500+ members

100
Around member meetings every year

1.7+ million
Page views on bpf.co.uk each year

18
Membership groups

5
Central expert committees
Welcome to this comprehensive directory of the corporate members of the British Plastics Federation.

It constitutes a showcase of the best of British manufacturing and supply in plastics and related fields. BPF member firms undergo a rigorous admissions procedure and all the companies listed can be recommended to the global marketplace with confidence.

The UK occupies a special role in the global plastics industry. Arguably it was the birthplace of the industry with the very first commercially available plastics material being made available in 1862 by the Birmingham entrepreneur, Alexander Parkes.

It was in the Runcorn laboratories of ICI that Polyethylene was first discovered in 1933. The UK was also one of the first countries to exploit the use of PET for the packaging of carbonated beverages. In 1978 PEEK, the high-performance polymer, was invented in the UK, again by ICI.

The UK plastics industry presents many strengths. Its proximity to oil and gas (including shale gas) has led to the creation of leaders in polymer production. The varied geology of the UK has provided a base for an enormously wide range of additives.

The UK is home to world class plastics processors and to an impressive array of manufacturers of ancillary equipment. Additionally, the large number of recyclers in the UK presents a picture of sustainability. These recyclers represent all aspects of the plastics recycling industry from the supply of feedstocks through to the final recapture of products and the use of renewed materials.

The infrastructure supporting the UK plastics industry is second to none. We have front-line university departments; training providers and testing houses and their details can be found in this booklet. Since its origination, the UK plastics industry has been proud to serve world markets and today the British Plastics Federation regularly exhibits at major exhibitions in the UK – Interplas and PDM – and fairs around the world. We always have a major presence at Chinaplas in Shanghai and Guangzhou, the Kunststoffe fair in Dusseldorf and often exhibit at Plast in Milan.

There are many locations where you can make contact with us and talk about UK plastics. Virtual contact is also extremely easy through our website, www.bpf.co.uk. Here you will be able to download this directory, but I am sure you will also find the wider information available there to be of extraordinary width and of impressive authority.

Not only is the UK a leading manufacturer but it is playing a strong role in the development of ‘the sustainability concept’ as it applies to industrial materials. We have a very clear vision of how to realise a plastics circular economy. For this go to www.bpf.co.uk/vision. On our website, you will also be able to access many resources which explain the benefits of plastics in general along with the benefits of specific plastics materials such as PVC and EPS. Our associated website www.polymerzone.co.uk is a substantial repository of plastics related information for the use of teachers and school children.

We are here to help you access the UK plastics industry and to serve the global market. Together we can provide solutions and improve the quality of life for the world’s citizens through the wonderful medium of plastics.
No. 1 website in Europe for plastics

1.7 million page views per year

★ A top source of information for the entire plastics industry.
★ On the first page of Google for a large range of plastic-related terms.
★ Features plastics news, encyclopedia, events, member areas, educational materials, and popular plastics directory.
★ For opportunities to advertise across the site visit www.bpf.co.uk/mediapack

10 benefits to being a member

Promote Your Business
Your company profile and news featured on our website, engage with our 15,000+ followers across LinkedIn, Twitter and Facebook, and feature in our industry bulletins and BPF newsletter.

Sales Leads
Receive sales leads generated via international events and the BPF website, direct to your inbox.

Feature in the BPF Directory
Every year, over 3,000 copies of the BPF Members Directory are handed out at trade shows around the world, while it is also downloaded thousands of times online. Your company will feature.

Lobbying & Representation
The BPF is in constant dialogue with all key government departments, and will represent your views when it comes to policy that matters to you.

Technical & Legislative Guidance
Dedicated executives keep up to date on technical developments and legislative changes crucial to the industry. Freely available to you if you join.
Free Legal Support & Grant Finder
A 24-hour phone line with lawyers to assist with your legal questions, and a huge range of downloadable legal templates and documents. Access to the BPF funding portal that searches grants and soft loans to help your company.

One-stop Shop For Free Resources
Polymer price updates, global market reports, plastic fact infographics, 1000s of seminar presentations, and specialist webinars throughout the year, all at your fingertips.

Industry News & Alerts
You won’t need to go far to find the latest in the world of plastic... Our newsletters and bulletins provide up-to-date coverage on important industry matters.

Special Prices for Events
The BPF holds over a dozen seminars and conferences a year, organises pavilions at UK and foreign trade shows and offers discounts exclusive to BPF members.

Discounts on a Range of Services
The BPF’s wider network includes courses, recruitment companies, energy consultants, financial services and more. As a member you receive special discounts to all of these.

Thank you to the sponsors of this directory
The UK is the birthplace of plastics, with the first man-made plastic, Parkesine, being patented in 1856.

The UK has a strong chemicals industry that is a highly valued part of the UK’s accessible supply chain. There is an abundance of end markets in the UK, including a world-leading automotive sector as well as a sophisticated and highly evolved retail sector.

Export is also hugely important for the UK plastics industry. It exports plastic products and materials worth £9.6bn each year. Out of the BPF’s members, 80% are exporters. The plastics industry is the UK’s third largest manufacturing sector in terms of employment, with 6,200 companies employing over 182,000 people.

Industry turnover increased since 2010 and is now £27bn. This figure includes manufacturers of raw materials, plastic products, equipment suppliers and recyclers.

In recent years, the UK plastics industry has been shown to be one of the most productive in Europe when benchmarked against the leading five economies. What’s more, productivity is increasing year on year, with the industry continuing to invest significantly in energy-efficient machinery and automation.
Plastics: the key enabler

The unique properties of plastics make the modern lives we enjoy today possible. They are a key enabling technology, with almost every other sector relying upon them in some way. In fact, manufacturing and the distribution of goods as we know it would be impossible without plastics.

**Aerospace**  
Composite fuselage, nose cones, tail planes and wings

**Automotive**  
Bumpers, dashboards, engine parts, seating and doors

**Construction**  
Insulation, window frames, doors, pipe systems, flooring, roofing and cladding

**Electrical**  
Television, computer housings and white goods

**Energy Generation**  
Wind turbines, solar panels and wave booms

**Furniture**  
Bedding, upholstery and household furniture

**Marine**  
Boat hulls and sails

**Medical / Healthcare**  
Syringes, blood bags, tubing, dialysis machines, heart valves, artificial limbs and wound dressings

**Military**  
Helmets, body armour, tanks, warships, aircraft and communications equipment

**Packaging**  
Bottles, crates, pallets, food containers, trays, drums and films
UK Plastics Industry

- **6,200** Companies in the plastics industry
- **£27 bn*** Plastics industry turnover
- **182,000** People employed
- **1.8 m** Tonnes of material produced
- **3.3 m** Tonnes of plastics materials processed
- **£9.6 bn** Value of exports in UK manufacturing sector
- **120%** Increase in plastic packaging recycling over the past 10 years
- **UK’s top 10 exports**

*Includes raw material, products, recycling and equipment

Advanced Cooling Solutions
for Extrusion & Moulding Processes

Expert technical advice and factory direct pricing, since 1998

Coolflow

Process Cooling Fluids

A range of fully inhibited coolants for plastic manufacturing processes. Coolflow products are installed in a diverse cross-section of production machinery and AC systems, of all sizes throughout the UK.

Inspire and deepen young people’s understanding of plastics

Classroom activities, 50+ videos, downloadable posters and other materials
Effective filter and component cleaning for the plastics industry, through a choice of quality-controlled cleaning processes.

DEECOM®
Our patented environmentally friendly cleaning process for expensive, fine-grade steel filters and components cleans and rejuvenates without damage or pitting for less downtime, lower cleaning costs and increased component lifetime, using only superheated steam.

PYROLYSIS BURN-OFF
Cleaning of components to remove a wide range of contaminants for multiple re-use of production components.

HOW CLEAN IS YOUR CLEAN?
WE CAN ACHIEVE UP TO ROLLS ROYCE SPECIFICATION

Contact us today to arrange a FREE cleaning trial on 01254 680501 or visit our website to find out more

www.bmlongworth.com
Dare to break the mould

Improve your plastics cycle times by 40%

In every part of your process, you’re being challenged to do more with less, learn how the BOC PLASTINUM® range can help you to achieve:

→ Productivity improvements
→ Lightweighting and material efficiency gains
→ Quality improvements
→ Environmental improvements

For more information please visit BOConline.co.uk/plastics

PLASTINUM® is an EU-registered trademark of The Linde Group
ThermaBead Ltd are industry leaders in providing high performance, injected blown bead insulation systems. With outstanding cavity wall insulating properties, it is ideal for domestic, commercial and industrial use. With exceptional durability, water resistant and rot proof our bead product is the number one choice for insulation.

- Providing 100% cavity fill with no cold spots, no waste and easy to install
- Up to 20% more efficient than standard fibre insulation
- 30% less drill holes compared to the standard solution
- Up to 30% reduction on fuel bills
- Reduces heat loss by around 70%

FOR MORE INFORMATION CONTACT US ON
T 0800 0210002 E sales@thermabead.co.uk thermabead.co.uk

The environmental cost increases 4 times if you replace plastic with alternative materials

Using alternative materials to plastic packaging could result in 2.7 times more greenhouse gas emissions

Design, Develop and Deliver with Distrupol

Distrupol is a European leader in the sales and application development of thermoplastic polymers and elastomers.

Our highly experienced sales and technical team will support you with mould design, polymer selection, testing, process optimisation and project development.

We cover a large range of industries from Medical and Automotive to Extrusion and Energy & Electrical.

Visit our website or get in touch today to get a sample or quote!

Training & Technology for Injection Moulders

Science Manufacturing Technician (Level 3) Apprenticeship
Technical Training and Consultancy Support

Studies suggest that strategically managing employee training can result in two times the revenue per employee. RJG training can partner with you to close your company’s skills gap.

Technical support for plastic materials, products and processes

We can help with:
• Development and implementation of effective management systems
• Material selection, development and analysis
• Processing and optimisation
• Product design
• Life prediction, environmental analysis and ageing
• Failure analysis and prevention
• Expert witness and technical dispute resolution

LARGEST DISTRIBUTOR OF CONSTRUCTION PRODUCTS IN THE UK

- Excellent service delivery
  - Comprehensive UK coverage
  - State-of-the-art fleet
  - Flexible capability
  - Enhanced productivity and reduced complexity
- Offsite fabrication and consolidation centres
- World class health and safety and regulatory compliance
  - Industry leading best in class approach
  - Full FORS / Crossrail and other compliance
  - CEEOS champion
- Environmental efficiency
  - Product consolidation reduces the final mile movements and associated fuel costs
  - Vehicle innovation to maximise payload
- Maximum cost efficiencies
  - Competitive rates
  - Minimise stock loss
  - Removal of need to invest in expensive equipment
  - Distribution network capable of reducing cost per tonne
- Real added value
  - Our experience allows our customers to become more innovative, efficient and effective

Plastics
A Vision for a Circular Economy

www.bpf.co.uk/Vision
LG Energy Group

The British Plastics Federation joins forces with LG Energy Group, a market leader in energy procurement.

Having gone through a rigorous selection process based on trading capabilities, commitment to transparency and compliance expertise, the BPF is working closely with LG Energy Group to meet the plastic industries requirements for energy utilities management.

Why LG Energy Group?
- Investment in state of the art facilities, systems and most experienced personnel.
- Commitment to transparency; voluntary adoption of OFGEM’s proposed rules on transparency.
- Unique Accountability; LG Energy Group owns and operates a number of renewable energy assets, which utilises market intelligence when dealing with energy export.
- Provision of market leading service to all members, regardless of energy spend Provision of helpdesk function with independent advice.
- Dedicated account management.
- Access to vast energy resources supporting webinars, events etc.

LG Energy Group is a market leading, privately owned company which employs the UK’s most eminent and respected energy specialists. The business has been built on a commodity trading foundation – the correct backbone to any professional energy procurement business. LG Energy Group’s principled approach to transparency, service delivery and customer relations has encouraged a trust unrivalled in the industry.

Core principles of transparency, accountability and integrity are more than just a tag line, they run through everything that LG Energy Group does. British Plastics Federation members now have access to another channel to exploit market intelligence and industry experience through LG Energy Group and associated companies, further adding to the services provided by the British Plastics Federation.

PVC 2020 WILL CONTINUE TO BUILD ON THE REPUTATION OF THE TRIENNIAL CONFERENCE SERIES AS BEING THE WORLD’S LEADING CONFERENCE SUPPORTING THE GLOBAL PVC INDUSTRY.

Moving from its historic Brighton base to the Edinburgh International Conference Centre, PVC 2020 will deliver an extensive and varied technical programme over the three days of the conference. The ongoing development of PVC across its range of applications and the sustainability and business challenges facing the industry will be areas of focus, along with a spotlight on innovation.

General PVC 2020 enquiries – Melanie Boyce:
T 0207 415 7303

New Intouch i4 Cloud

Flexible and easy to use monitoring, scheduling, reporting and analytics system that significantly improves OEE. Built on Intouch’s 22 year history and over 300 installations, our new Intouch i4 Cloud offers the same benefits of our conventional system immediately and for a minimal capital investment.

- Improved capacity
- Improved throughput
- Improved quality/reduce scrap
- Improved use of labour
- Monitor energy consumption
- Less downtime and more parts at a lower cost
- Reveal and analyse loss – output speed/cycle times/line rates
- Reveal quality losses and reasons
- Leading to fewer shifts required
- Less energy use
