BPF Automotive Seminar 2019
BPF Automotive Seminar 2019

This one day seminar will provide attendees with an in-depth look at the current state of the automotive market and what the future holds for the industry. The event will examine trends in the industry as well as the automotive industries future relationship with the EU.

The event will then examine topics including electric vehicle, thermoplastic composites and the skills gap to provide you with an overall picture of what the future holds for plastics in the automotive industry and what you should be preparing for.

Who should attend: This seminar is aimed at senior and middle managers from companies in the plastics industry who are involved in the automotive supply chain.
