Join the BPF at this special one off Rotational Moulding Seminar, examining the subject of materials and with a particular focus on polyethylene.

The seminar, which is hosted by the BPF Rotational Moulding Group has been designed to explore the use of PE in rotational moulding applications and related issues.

This is your opportunity to network with fellow rotomoulders and to learn essential information about materials that you will be able to implement in your organisation.

**Topics at this event**

09.15 Gregoire Helou, ICO Polymers: How the density and MFI of polyethylene influence rotomolding process

09.45 Gary Lategan, Rotosolutions: How a Good Grind affects Quality, Properties & cost
